

Ladies Club Service Project

April

Cumberland House Hospice Auxiliary

They are requesting a monetary donation.

Hospice allows terminally ill patients to experience end of life together, in the comfort and security of home or home-like settings. It is about living as long as possible while being as comfortable as possible.

It provides equipment such as:

- **oxygen,**
- **hospital beds,**
- **wheelchairs, walkers,**
- **bedside commodes to help you care for your loved one in your home.**
- **Hospice provides care for as long as the person is clinically qualified, which could be days, weeks or even months.**
